| N/A | Avoid serving legacy JavaScript to modern browsers <small>TBT</small> | Potential savings of 11.0KB |
|-----|-----------------------------------------------------------------------|-----------------------------|

Polyfills and transforms enable legacy browsers to use new JavaScript features. However, many aren't necessary for modern browsers. For your bundled JavaScript, adopt a modern script deployment strategy using module/nomodule feature detection to reduce the amount of code shipped to modern browsers, while retaining support for legacy browsers.
