### Top Issues

|          |                                                |                                 |
|----------|------------------------------------------------|---------------------------------|
| High     | Avoid enormous network payloads<br>LCP         | Total size was 10.4MB           |
| High     | Avoid long main-thread tasks<br>TBT            | 20 long tasks found             |
| High     | Reduce JavaScript execution time<br>TBT        | 8.0s spent executing JavaScript |
| Med-High | Avoid an excessive DOM size<br>TBT             | 4,349 elements                  |
| Med-High | Avoid chaining critical requests<br>FCP<br>LCP | 31 chains found                 |

Focus on these audits first

These audits likely have the largest impact on your page performance.

Structure audits do not directly affect your Performance Score, but improving the audits seen here can help as a starting point for overall performance gains.

## Page Details

Total Page Size - 10.3MB

Total Page Requests - 389

## How does this affect me?

Modern web users have a short attention span and expect a fast and seamless website experience. Delivering that fast experience can result in more traffic, more conversions, and more happiness.

As if you didn't need more incentive, **Google use Page Speed and Page Experience (including Web Vitals) signals in their ranking algorithm.**

## About TheNextLevel

Take your mobile experience to The Next Level. Design and launch your mobile application within a matter of hours using our app studio. Get access to a wide range of tools to help you engage better with customers from intelligent push messaging powered by AI to community builder giving customers the ability to interact with your brand within your mobile app.

The waterfall chart displays the loading behaviour of your site in your selected browser. It can be used to discover simple issues such as 404's or more complex issues such as external resources blocking page rendering.

IMPACT    AUDIT

High

**Avoid enormous network payloads**
LCP

Total size was 10.4MB

Large network payloads cost users real money and are highly correlated with long load times.

**Reduce JavaScript execution time**
TBT

8.0s spent executing JavaScript

Consider reducing the time spent parsing, compiling, and executing JS. You may find delivering smaller JS payloads helps with this.

Med-High

Avoid an excessive DOM size TBT

4,349 elements

A large DOM will increase memory usage, cause longer style calculations, and produce costly layout reflows.

| STATISTIC              | ELEMENT                                                                                                                                                                                                                                        | VALUE |

## Eliminate render-blocking resources

Potential savings of 131ms

Resources are blocking the first paint of your page. Consider delivering critical JS/CSS inline and deferring all non-critical JS/styles.

Resources that **may** be contributing to render-blocking include:

| URL                                                                                                                                                                                                                                                                 | TRANSFER SIZE | DOWNLOAD TIME |

Low

Reduce unused JavaScript LCP

Potential savings of 904KB

Reduce unused JavaScript and defer loading scripts until they are required to decrease bytes consumed by network activity.

Low

Minify CSS

FCP

LCP

Potential savings of 2.88KB

Minifying CSS files can reduce network payload sizes.

| URL                                                                                                                                                       | TRANSFER SIZE | POTENTIAL SAVINGS |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|-------------------|
| <ul style="list-style-type: none"> <li>!/* ! tailwindcss v3.2.4   MIT License   https://tailwindcss.com *//* 1. Prevent padding and border ...</li> </ul> | 18.2KB        | 2.88KB            |

Low

Avoid multiple page redirects

FCP

LCP

Potential savings of 99ms

Redirects introduce additional delays before the page can be loaded.

| URL                                                                                                                       | TIME SPENT |
|---------------------------------------------------------------------------------------------------------------------------|------------|
| <ul style="list-style-type: none"> <li><a href="http://tailoredathlete.com/">http://tailoredathlete.com/</a></li> </ul>   | 99ms       |
| <ul style="list-style-type: none"> <li><a href="https://tailoredathlete.com/">https://tailoredathlete.com/</a></li> </ul> | 0ms        |

Low

Enable text compression

FCP

LCP

Potential savings of 12.4KB

Text-based resources should be served with compression (gzip, deflate or brotli) to minimize total network bytes.

| URL                                                                                                                                                                                                                                                                                                                                                                     | TRANSFER SIZE | POTENTIAL SAVINGS |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|-------------------|

N/A **Minimize main-thread work** TBT Main-thread busy for 16.6s

Consider reducing the time spent parsing, compiling and executing JS. You may find delivering smaller JS payloads helps with this.

| CATEGORY                     | TIME SPENT |
|------------------------------|------------|
| Script Evaluation            | 8.6s       |

| Parse HTML & CSS             | 476ms      |
| Script Parsing & Compilation | 450ms      |
| Rendering                    | 274ms      |
| Garbage Collection           | 265ms      |

N/A **Reduce the impact of third-party code** TBT Third-party code blocked the main thread for 2.1s

Third-party code can significantly impact load performance. Limit the number of redundant third-party providers and try to load third-party code after your page has primarily finished loading.

| THIRD-PARTY                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | TRANSFER SIZE | MAIN-THREAD BLOCKING TIME |

**Avoid serving legacy JavaScript to modern browsers** TBT

Potential savings of 67.0KB

Polyfills and transforms enable legacy browsers to use new JavaScript features. However, many aren't necessary for modern browsers. For your bundled JavaScript, adopt a modern script deployment strategy using module/nomodule feature detection to reduce the amount of code shipped to modern browsers, while retaining support for legacy browsers.
