Avoid an excessive DOM size TBT

2,773 elements

A large DOM will increase memory usage, cause longer style calculations, and produce costly layout reflows.

Avoid serving legacy JavaScript to modern browsers TBT

Potential savings of 41.2KB

Polyfills and transforms enable legacy browsers to use new JavaScript features. However, many aren't necessary for modern browsers. For your bundled JavaScript, adopt a modern script deployment strategy using module/nomodule feature detection to reduce the amount of code shipped to modern browsers, while retaining support for legacy browsers.
