## How does this affect me?

Modern web users have a short attention span and expect a fast and seamless website experience. Delivering that fast experience can result in more traffic, more conversions, and more happiness.

As if you didn't need more incentive, **Google use Page Speed and Page Experience (including Web Vitals) signals in their ranking algorithm.**

**Avoid an excessive DOM size**

TBT

2,305 elements

A large DOM will increase memory usage, cause longer style calculations, and produce costly layout reflows.

N/A	Avoid serving legacy JavaScript to modern browsers TBT	Potential savings of 26.0KB

Polyfills and transforms enable legacy browsers to use new JavaScript features. However, many aren't necessary for modern browsers. For your bundled JavaScript, adopt a modern script deployment strategy using module/nomodule feature detection to reduce the amount of code shipped to modern browsers, while retaining support for legacy browsers.
